

# The New Revenue Recognition Standard — Do You Need Help?

January 2016 | Revenue Recognition Insights - #2

## You have a day job, and now you have to implement the new revenue recognition standard, too.

Beyond the technical uncertainties, implementation challenges abound. How many contracts need to be reviewed? Are current systems sufficient? How will disclosures be affected? Which transition method is appropriate? Is the data needed to comply available? Who has time to do this?

When these questions seem overwhelming, don't procrastinate — call for reinforcements. We are proven professionals with 10-20 years' experience across a broad range of business disciplines and initiatives. We have the expertise and experience to get the job done — from advice through execution. Our consultants have completed a comprehensive revenue recognition certification program and are ready to lead and/or work alongside your team in all aspects of implementation.

Our flexible model and lack of independence issues allow us to guide you through the entire implementation. Our approach is scalable to your changing needs throughout the project, and our goal is to integrate with your team for seamless implementation, providing the expertise and resources where and when you need them, at a cost lower than other firms.

For a free consultation with one of our technical experts on how the standard will impact you, contact us.
