

A Holistic Framework for Driving Project Success

RGP's holistic framework for Portfolio, Program and Project Management enables you to reduce the risks of project failure and enhance your ability to consistently achieve expected benefits. The organizational "muscles" you build at the project and program level drive higher performance at the portfolio level, fueling a virtuous cycle that delivers the expected results.

PORTFOLIO LEVEL

Strategic Portfolio Management

- Real-time visibility of project health across the portfolio via dashboards
- Thorough tracking of benefits against original business cases
- Predictable cadence of executive review and decision-making related to portfolio
- Effective governance and resource management processes

Adaptive Project Culture

- Continuously capture lessons learned related to project success/failure and execute changes in all impacted areas
- Ongoing analysis and reporting of performance vs. goals

Continuous Skills Enhancement

- Broad-based training on Project and Change Management to build internal improvement "muscles"
- Ongoing portfolio-wide assessment of new competencies required to optimize ROI from initiatives, with a continuous learning curriculum to close gaps

PROJECT & PROGRAM LEVEL

Aligned & Committed Leadership

- Clear stakeholder alignment around each business case and expected benefits from projects
- Engaged leaders and established responsibilities
- Continuous synchronization with enterprise strategic objectives

Advanced Project / Program Management

- Modern approaches to project and program management (e.g., Agile, digital PM, etc.)
- Dedicated project leaders leveraging best practices
- Robust risk management
- Dynamic project management and collaboration tools

Effective Change Management

- Structured change approach tailored to each specific project with established success metrics
- Holistic view of people impacts across current and planned projects
- Diligent tracking of actual adoption

Business Transforms When Projects Perform™
