

ESG Reporting Strategy Roadmap

RGP can help you develop and successfully execute a clear Environmental, Social and Governance reporting strategy roadmap to better navigate evolving stakeholder expectations, standards and regulatory requirements.

Scrutiny is intensifying around how organizations manage and report ESG-related activities, especially on the issue of climate risk. Regulators, investors, rating agencies, consumers and employees are frustrated by reporting inconsistencies and variations, escalating pressure to improve internal processes and metrics. **We help you address challenges at multiple levels, creating a roadmap that helps you:**

- Adhere consistently to standards and frameworks
- Manage ESG processes across multiple stakeholders
- Ensure data quality of financial and non-financial data

RGP Advances Your ESG Program with Reporting

We work with you through every stage of developing your reporting strategy roadmap, helping you to overcome the challenges that many organizations encounter during the midpoint stages of execution.

Dedicated Experts for Your ESG Reporting Needs

Our results-oriented teams have decades of experience working with organizations to navigate the broad, ever-changing Environmental, Social and Governance regulatory landscape and meet strategic reporting needs. We bring in project consultants with the right expertise from across our different practice areas to meet your specific needs.

Technical Accounting

SEC Readiness
Assessment

Evaluate organizational current state to support climate-related disclosure development. Identify gaps and recommendations in advance of financial disclosure preparation.

Operational Reporting

ESG Reporting Program
Assessment

Develop or evaluate execution of ESG reporting strategy and assess alignment to sustainability-related standards & frameworks as reported by topic/initiative. Provide recommendations for reporting enhancement.

Risk & Controls

ESG Performance Metrics:
Audit Readiness

Conduct audit readiness for ESG-related performance metric data and evaluate for process-level control design. Identify control design gaps and remediation plan to improve quality of non-financial data reported.

Transform how you manage and report on ESG initiatives with automated reporting solutions.

“Momentum is building in both the U.S. and abroad for regulatory bodies to streamline and strengthen the reporting requirements for more consistent interpretation across companies’ ESG reporting.”

Janis Parthun, VP, Project Consulting Service

About RGP

Founded in 1996, RGP is a project consulting and professional staffing firm. Our experts help clients execute transformational initiatives across the enterprise. Today’s project economy reflects our founding strategy – quickly align specialized resources for the work at hand with a premium placed on value, efficiency and ease of collaboration. Based in Irvine, California, with offices worldwide, our model enables top consulting talent to work differently, with radical flexibility and purpose – features unavailable in traditional consulting firms. This winning value proposition has enabled us to become the leading provider of agile consulting services.
